[Energy & Natural Resources](#)

ENERGY & NATURAL RESOURCES

For Bavaria as a land of innovation and industry, having the access to reliable, competitive and affordable energy is indispensable. Future-oriented energy policies require consistency in conserving energy, increasing energy efficiency and continuous development of renewable energies.

ENERGY POLICY

Future-oriented energy policies require consistency in conserving energy, increasing energy efficiency and continuous development of renewable energies.

RENEWABLE ENERGIES

Renewable resources, hydro and wind power, bio energy, solar energy, ambient heat and geothermal energy are already making an important contribution to the supply of energy.

NATURAL RESOURCES

Natural resources are essential for every industrialized state. Our future key technologies need special high-quality metallic raw materials.
