Delegation trips

DELEGATION TRIPS

Delegations headed by politicians can assist companies in developing new markets. The head of ministry leads delegations to important international markets where political influence can open the doors for companies.

The Bavarian Ministry of Economic Affairs undertakes these delegation trips jointly with Bayern International in order to help Bavarian companies obtain key contacts in countries with great economic potential.

Each year, the Bavarian Ministry of Economic Affairs offers 10 to 15 delegation trips to new and promising markets. The focus is on the interests of Bavarian companies and their export objectives. Bayern International takes care of all travel logistics.

The advantages for companies and impressions from trips are illustrated in examples, reports, photos and videos provided by [Bayern International](#).
